SelectGameModeScene

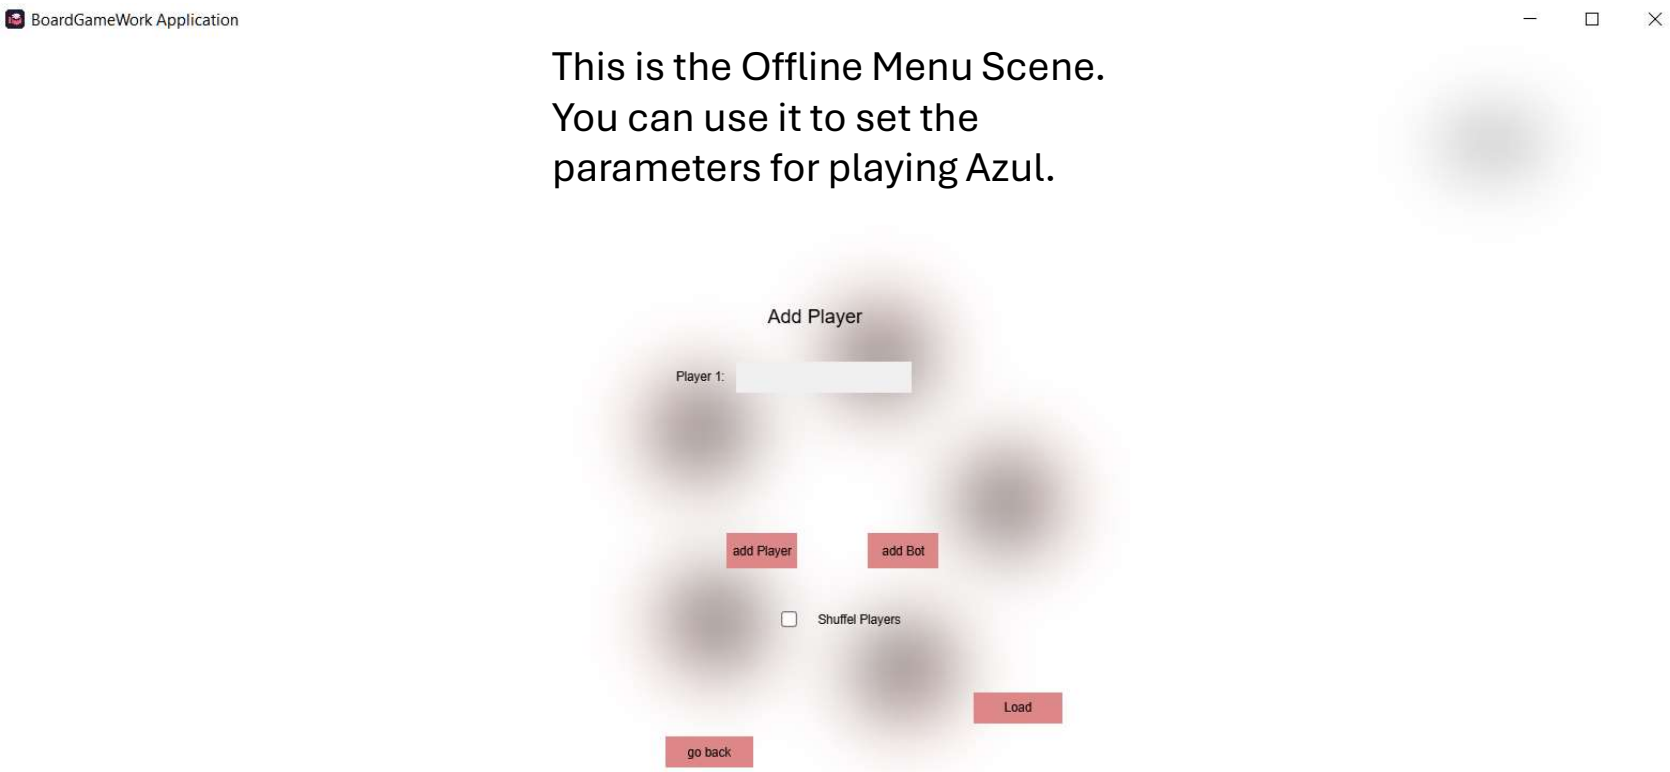

SelectGameModeScene

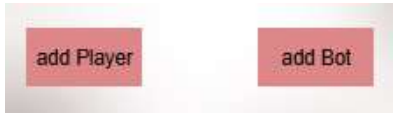

- Upon clicking offline you will be directed to the Offline Game Menu while online will bring you to the Online Game Menu
- You can quit the game via the Quit Button

OfflineMainMenuScene

OfflineMainMenuScene

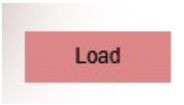

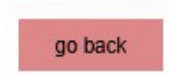

- You can have up to four players or bots by adding them via the buttons
- Choose their names by inputting them into the text fields
- The icon next to the text fields indicates whether the player is a bot or not
- You can choose to shuffle the starting order or keep it as is according to the order you added the players in

OfflineMainMenuScene

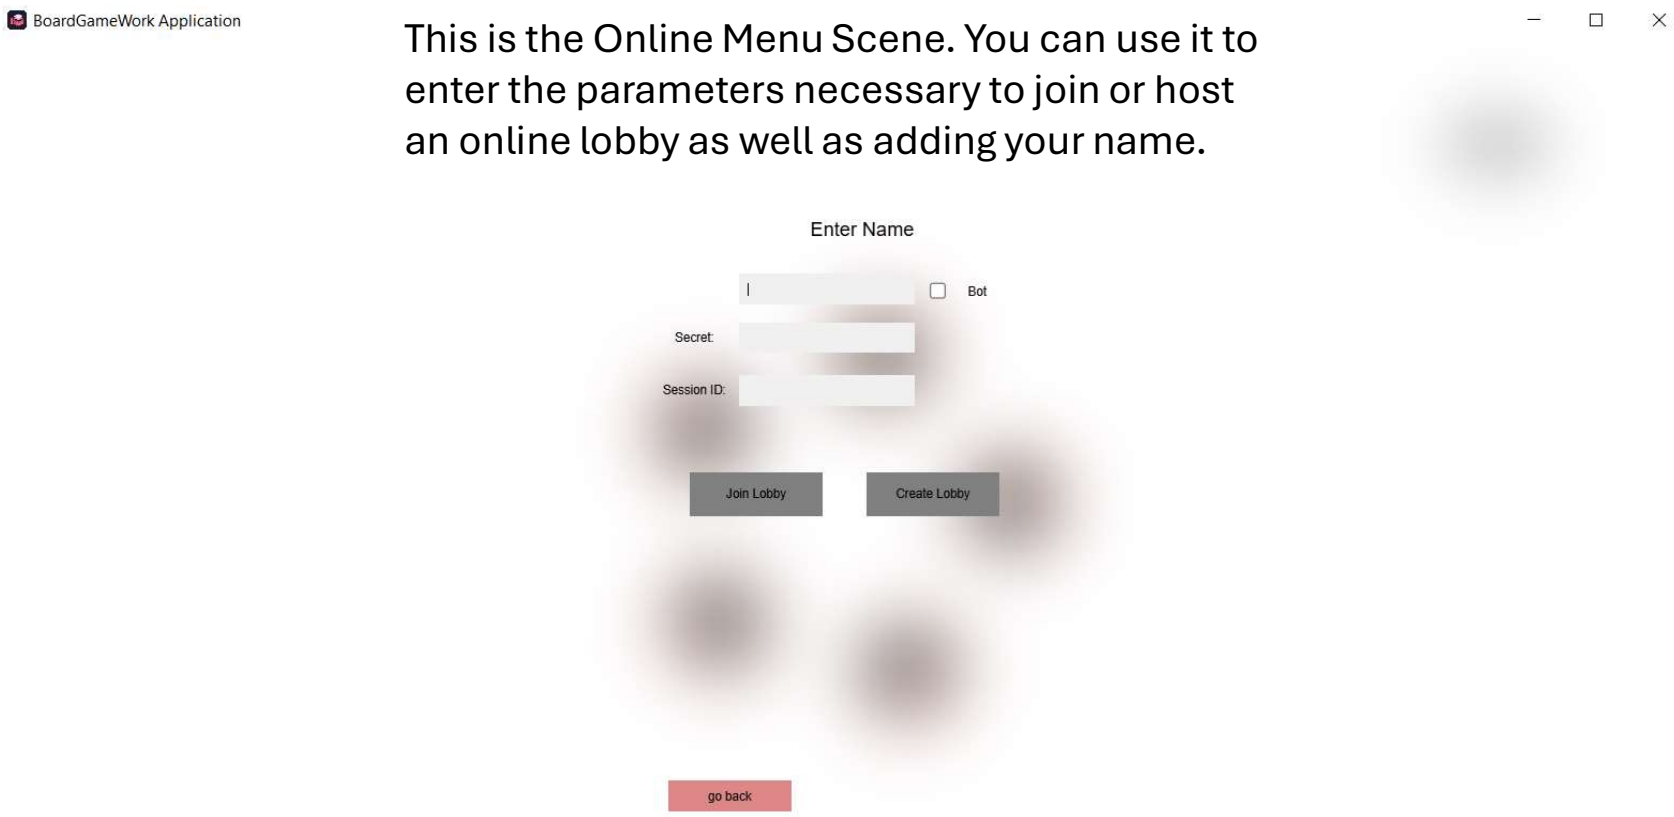

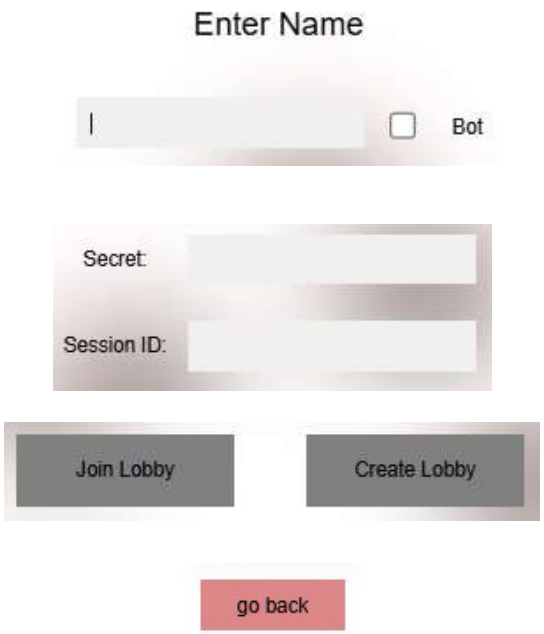

- Use the Load Button if you have a saved game already and wish to continue playing it
- Use the Go Back Button if you wish to return to the SelectGameModeScene

OnlineMainMenuScene

This is the Online Menu Scene. You can use it to enter the parameters necessary to join or host an online lobby as well as adding your name.

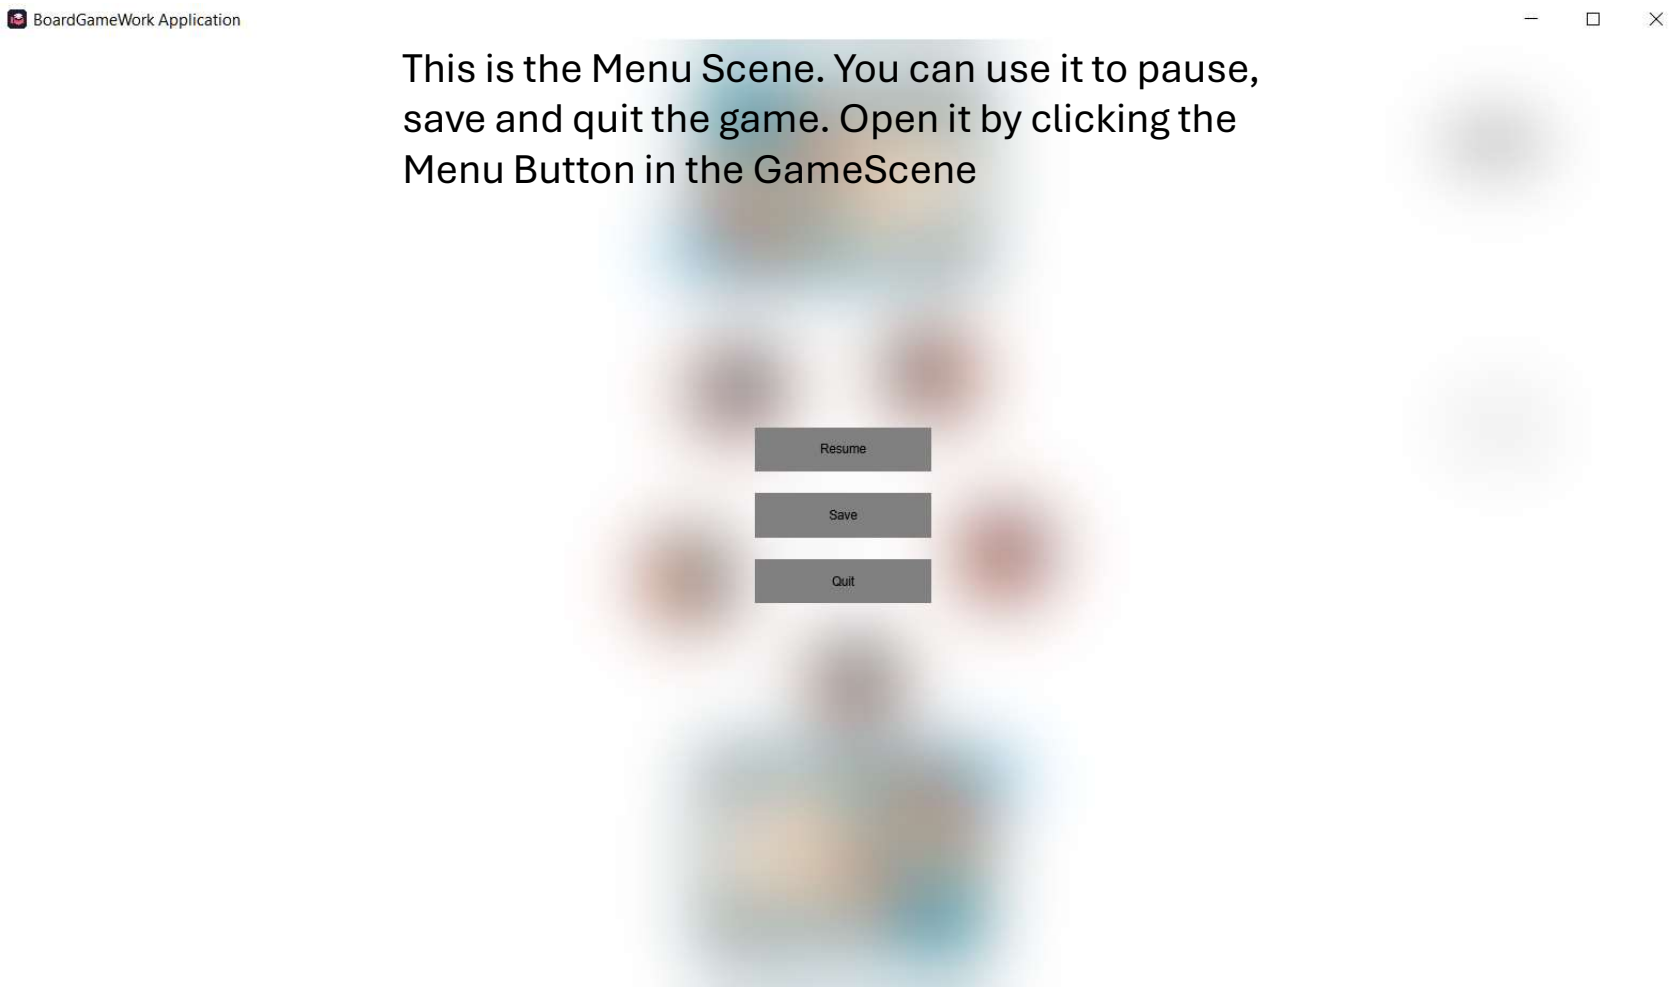

OnlineMainMenuScene

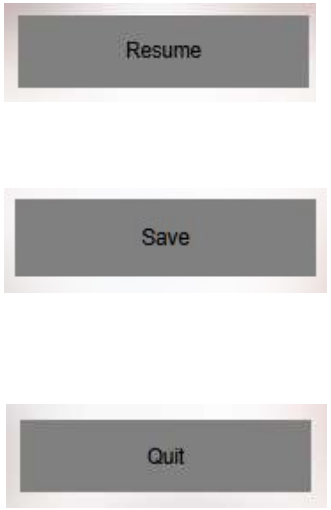

- You may enter a name and choose whether a bot or an actual human will play the game
- Enter a Session ID and the Secret in order to join or set these in order to host
- Then choose the corresponding action via button click
- Return to the SelectGameModeScene by clicking the Go Back Button

MenuScene

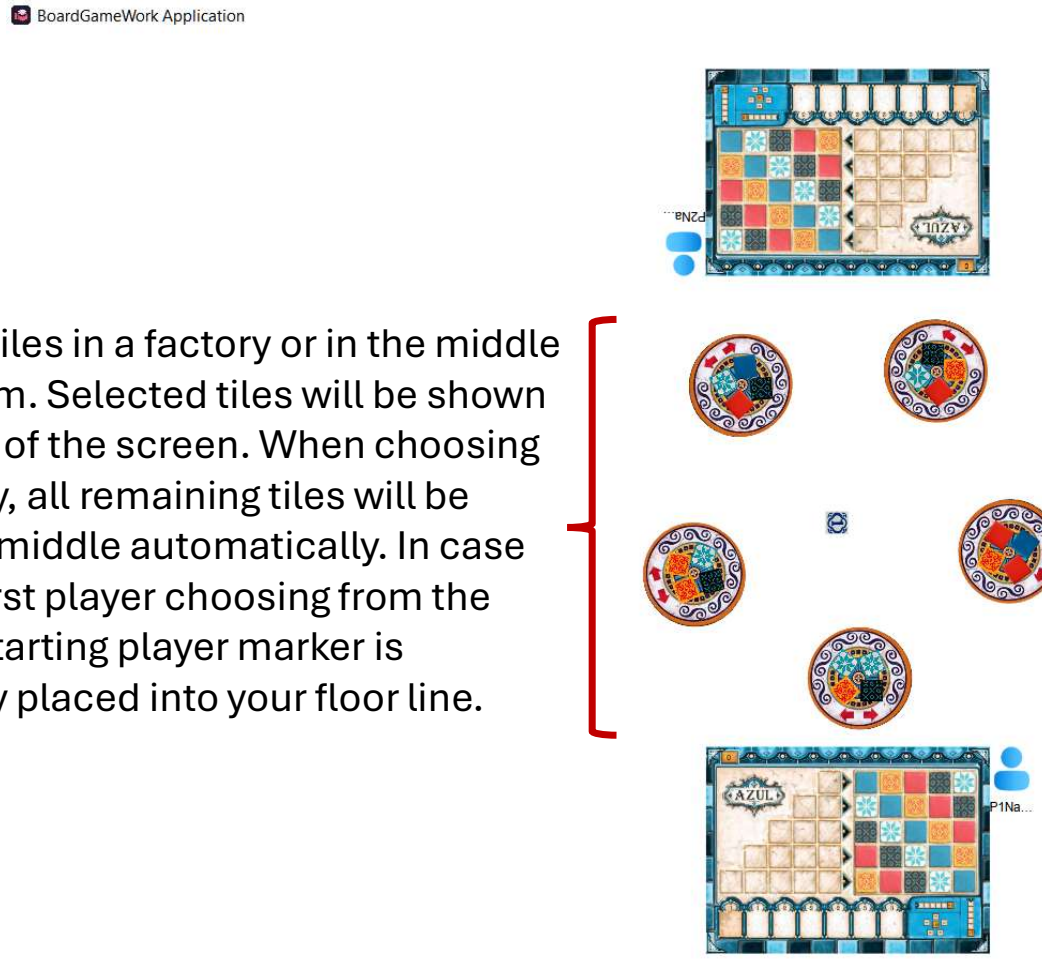

This is the Menu Scene. You can use it to pause, save and quit the game. Open it by clicking the Menu Button in the GameScene

MenuScene

- This button lets you resume the game
- This button lets you save the game. You can still choose to quit or resume afterwards
- This button lets you quit the game

GameScene

Click on any tiles in a factory or in the middle to select them. Selected tiles will be shown in the top left of the screen. When choosing from a factory, all remaining tiles will be shown in the middle automatically. In case you are the first player choosing from the middle, the starting player marker is automatically placed into your floor line.

Click here to open the MenuScene

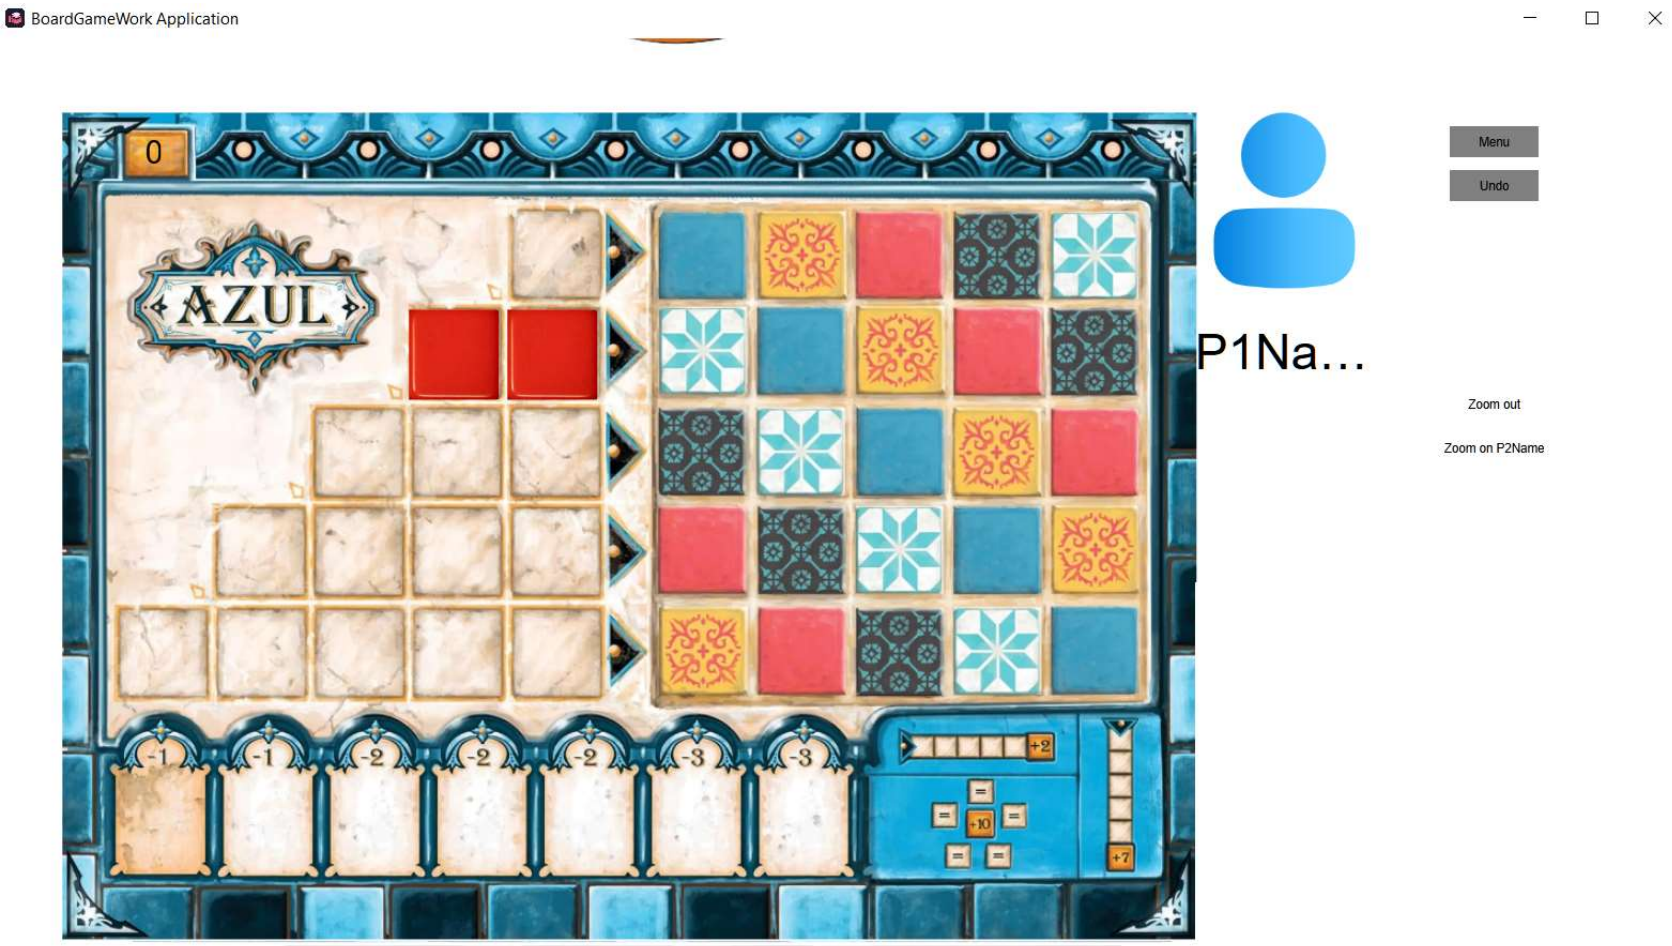

Use these buttons to zoom in on any player‘s board during your turn to take a better look at it

GameScene

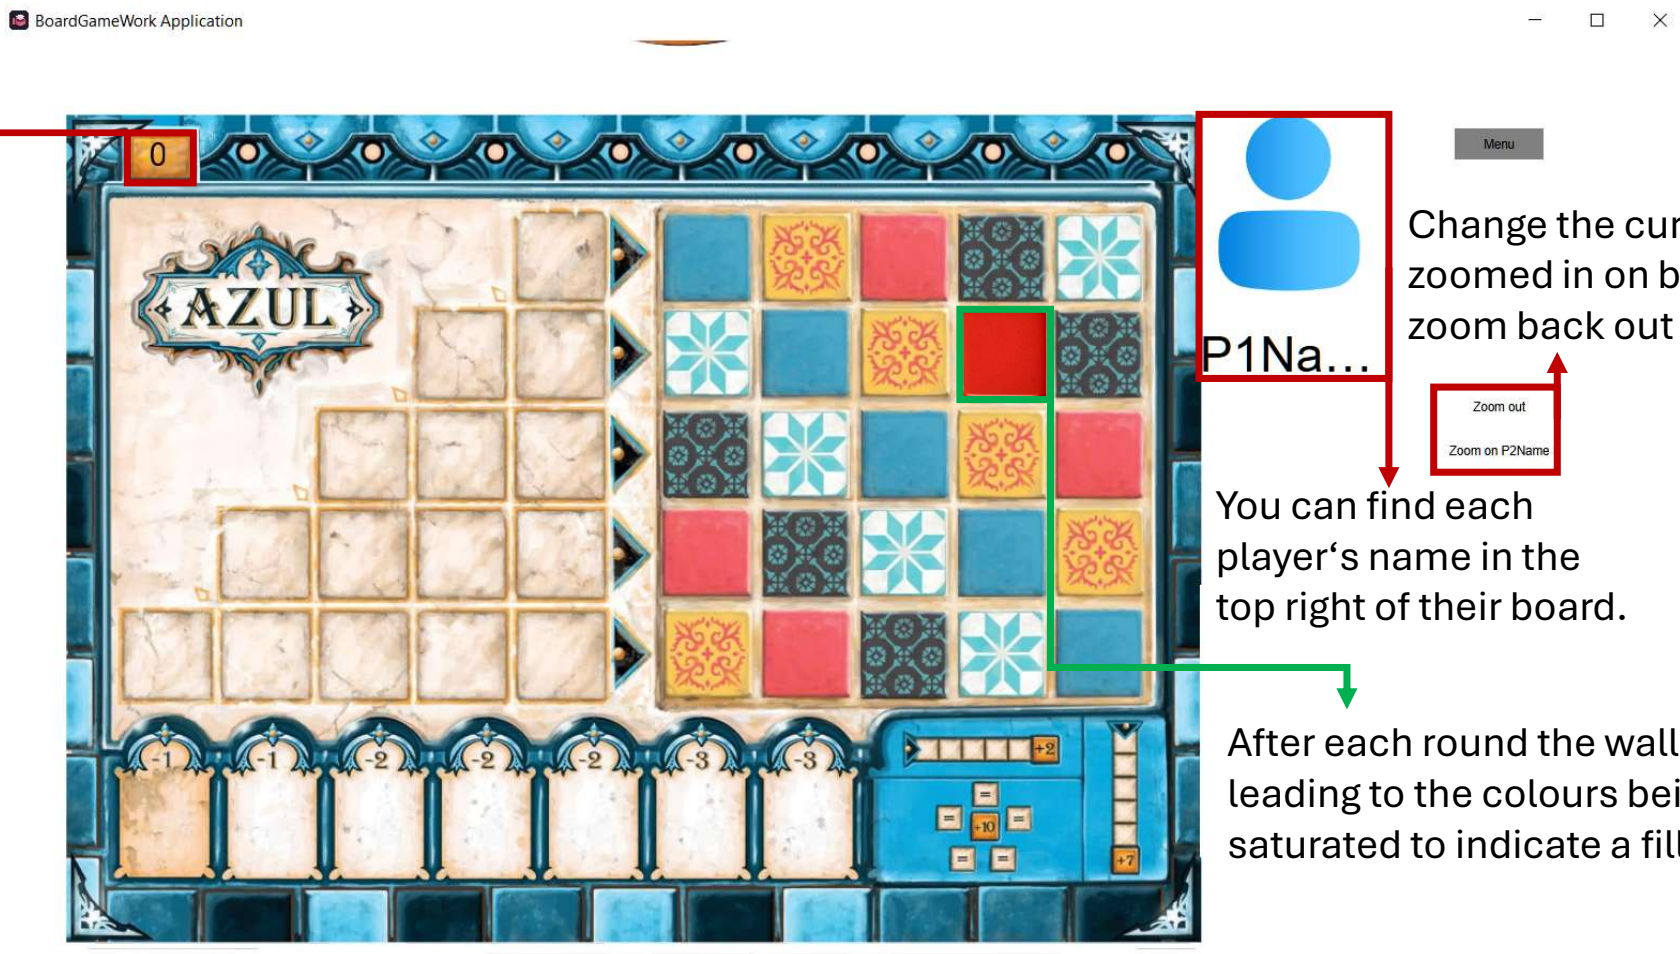

After selecting your tiles you can then choose any line on your board to place the tiles. Any excess tiles are placed onto the floor line automatically.

Zoomed in view

Zoomed in view

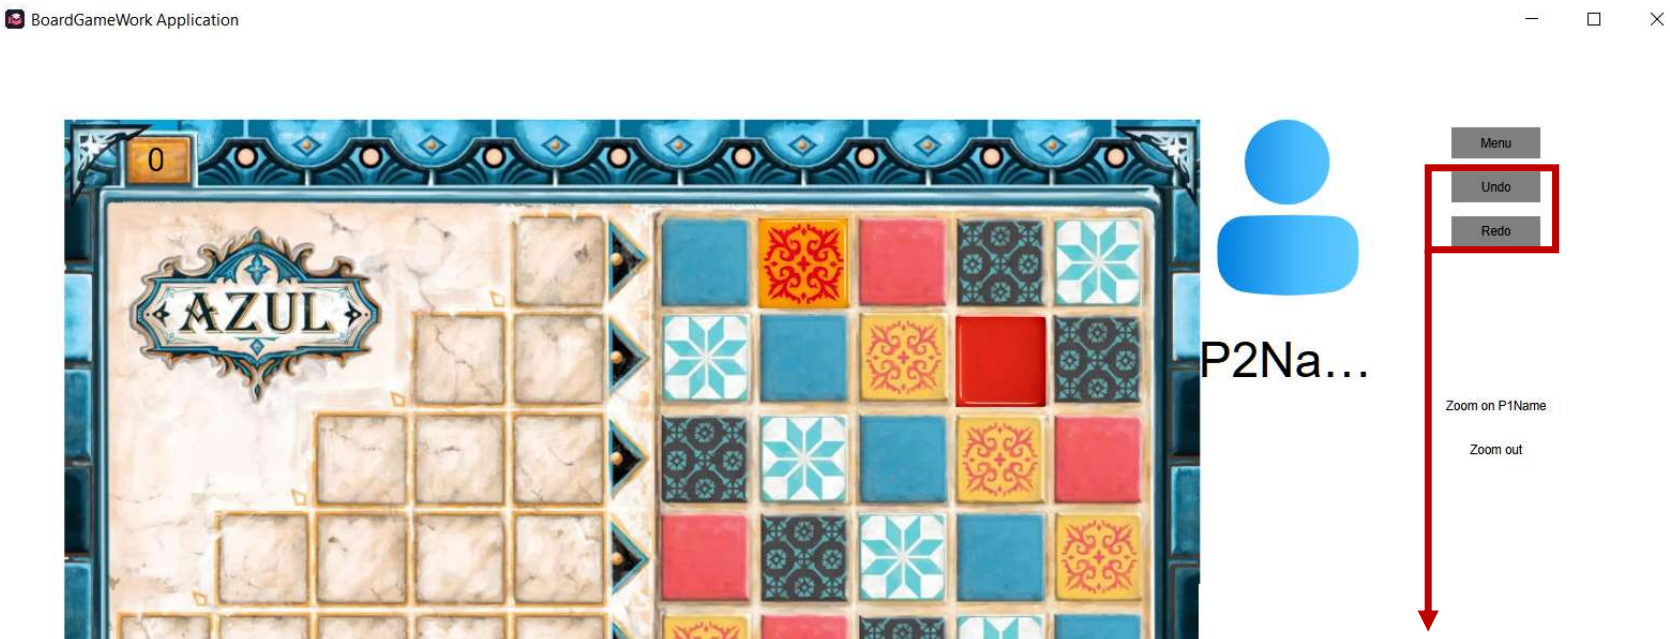

You can find each player‘s points in the top left of their board.

Change the currently zoomed in on board or zoom back out here

You can find each player‘s name in the top right of their board.

After each round the wall is filled, leading to the colours being more saturated to indicate a filled tile

Zoomed in view

You may even undo or redo as much as you wish, however, this feature is only available in offline mode. After undoing and playing a different turn you may no longer redo the previously undone turn via button click.

GameOverScene

This is the ending screen. Here you can see the points of every player and the crown symbol indicates the winner. You can click on restart to restart.
